

Initiative

for Companies to Register Unregistered or Unavailable Pharmaceutical Products

An initiative presented by the Saudi Food and Drug Authority (SFDA) that provides benefits to companies wishing to register unregistered or unavailable pharmaceutical products.

Initiative Objectives

Achieving pharmaceutical availability in the Kingdom of Saudi Arabia

Supporting local manufacturing

Benefits and Incentives

Priority on registration

Exclusive marketing of low-demand medicines

Support the pricing of products with low economic feasibility

Support technical, organizational and financial requirements for registration services

What?

do pharmaceutical companies benefit from registering their products

To be legally permitted to sell and market the drug in government and private hospitals and pharmacies

To ensure the safety, efficacy, and quality of the products
