## Introduction

### Purpose

The purpose of this document is to specify and clarify the requirements for importing and re-exporting radioactive materials used in medical applications.

### Scope

This document applies to:

- Radioactive materials used in medical applications.
- Importers and exporters of radioactive materials used in medical applications.
- Healthcare providers and research centers who are willing to import or re-export radioactive materials used in medical applications.

### Background

SFDA has issued this document in reference to Article four of the “Medical Devices Law “issued by Royal Decree No. (M/54) dated 06/07/1442 H and Articles (2/1), (4/1) and (4/2) of the “Implementing Regulation of Medical Devices Law” issued by Board Resolution No. (3-29-1443) dated 2/19/1443 H, which state the following:

- Establishments/applicants who are willing to import or re-export radioactive materials must fulfil the SFDA requirements for importing and re-exporting radioactive materials used in medical applications, which are published on the SFDA’s website.
- The SFDA issues technical and clinical specifications approvals or rejections within ten days of receiving the request for importation or re-exportation of radioactive medical materials.

## Requirements

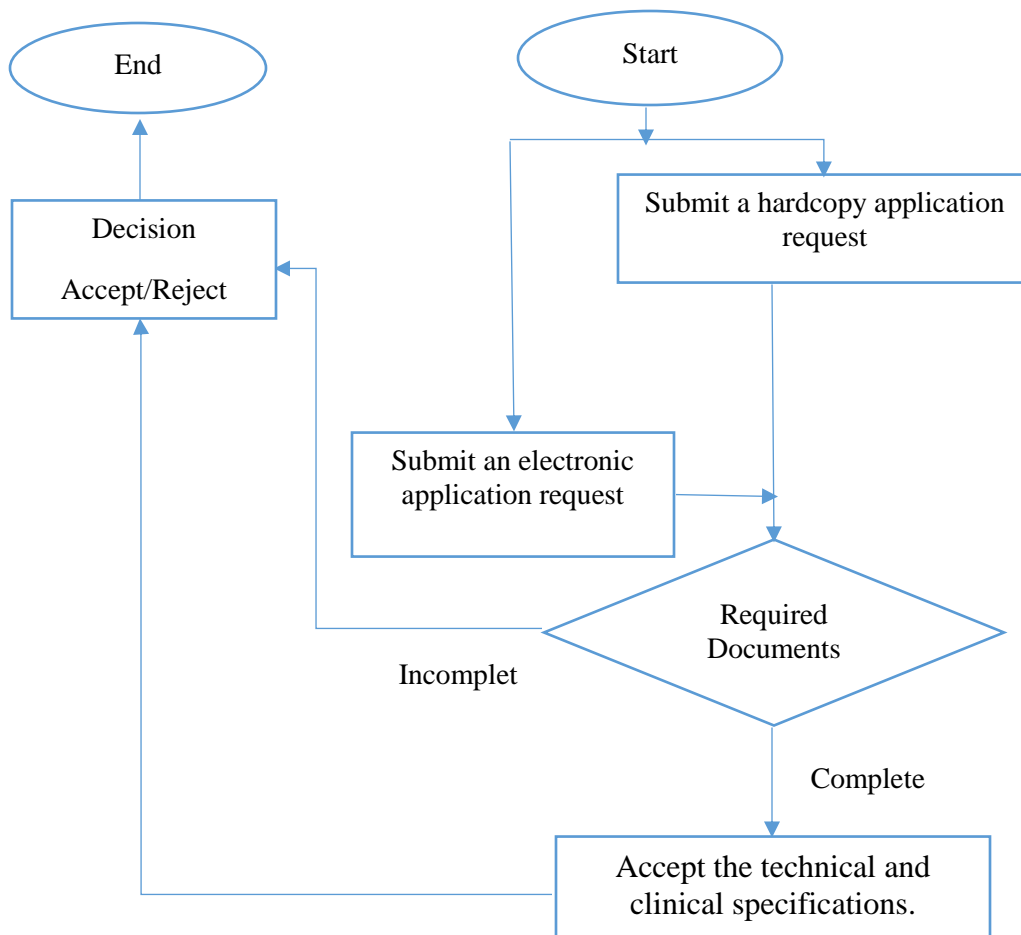

General	1	<ul style="list-style-type: none"> <li>▪ Radioactive materials used in medical applications can only be imported or re-exported after the SFDA has approved those materials' technical and clinical specifications of those materials.</li> <li>▪ Medical radioactive materials used in medical applications that are classified as a medical device/supply must obtain a marketing authorization for medical devices (MDMA)</li> </ul>
SFDA Prerequisite	2	<ul style="list-style-type: none"> <li>▪ Importers and exporters of radioactive materials used in medical applications shall have Medical Device Establishment License (MDEL).</li> <li>▪ Obtaining the necessary licenses from the Nuclear and Radiological Regulatory Commission (NRRC) to practice activities associated with the use of radioactive materials for both beneficiary and carrier facilities as well as fulfilling the requirements of relevant authorities before applying.</li> </ul>
	3	Health care providers and research centers wishing to import or re-export radioactive medical materials must register in the <a href="#">unified electronic system (GHAD)</a> and obtain an account number. Meanwhile, obtaining a license to engage in import and/or re-export activities is unnecessary.
Submitting a request	4	<ul style="list-style-type: none"> <li>▪ Submitting a request to <a href="#">Radioactive Materials Registration System</a></li> <li>▪ Submitting the documents referred to in “<a href="#">Required Documents.</a>”</li> <li>▪ The SFDA conducts technical evaluations for the requests, then accepts or rejects the technical and clinical specifications.</li> </ul>
Import and re-export facilities responsibility	5	Importers and exporters are obligated by what is stated in the “ <a href="#">Application Form of Importation/Re-Exportation for Radioactive Materials.</a> ”

## Required Documents

	Required Documents	Notes
1	Copy of MDEL license to practice the activity of importation and re-exportation of medical radioactive materials (issued by the SFDA).	<ul style="list-style-type: none"> <li>Healthcare providers and research centers are exempt.</li> </ul>
2	Copy of the MDMA for radioactive material classified as a medical device (issued by SFDA).	<ul style="list-style-type: none"> <li>Radioactive material that are classified as a medical device.</li> </ul>
3	Copy of Radiation Practice License assigned to the Beneficiary	<ul style="list-style-type: none"> <li>Issued by NRRC.</li> </ul>
4	Copy of Radiation Safety Officer (RSO) License assigned to the radiation protection officer at the beneficiary	<ul style="list-style-type: none"> <li>Issued by NRRC.</li> <li>It must be accompanied by the following: <ul style="list-style-type: none"> <li>Copy of the national identity card/residency card.</li> <li>Proof that the RSO is on the sponsorship of the beneficiary facility or contracted with it.</li> </ul> </li> </ul>
5	Copy of the licensees of all the RSO in the carrier beneficiary establishment	<ul style="list-style-type: none"> <li>Issued by NRRC.</li> <li>It must be accompanied by the following: <ul style="list-style-type: none"> <li>Copy of the national identity card.</li> <li>Proof that the RSO is under the sponsorship of the beneficiary facility or contracted with it.</li> </ul> </li> </ul>
6	Copy of facility license for transporting the radioactive material	<ul style="list-style-type: none"> <li>Issued by NRRC.</li> </ul>
7	Manufacturer invoice	<ul style="list-style-type: none"> <li>It must include the following: <ul style="list-style-type: none"> <li>Description of the shipment (names of items).</li> <li>Trade/scientific name.</li> <li>Quantity (total/detailed).</li> <li>The radioactivity of each material</li> <li>Unit weight for each item and total weight for each package.</li> <li>The unit price for each item.</li> <li>Production and expiration date.</li> <li>Batch/operation number.</li> </ul> </li> </ul>
8	Original certificate of origin	<ul style="list-style-type: none"> <li>It must be stamped by the concerned party with trade in the country of origin.</li> </ul>
9	Copy of the manufacturer Quality Management System (QMS) certificate in addition to the Good Manufacturer Practice (GMP) certificate.	<ul style="list-style-type: none"> <li></li> </ul>
10	Copy of the purchase order (PO) from the beneficiary.	<ul style="list-style-type: none"> <li>Healthcare providers and research centers are exempt.</li> </ul>
11	An official letter or free sale certificate proving that the materials are marketed in the country of origin.	<ul style="list-style-type: none"> <li>For importing only.</li> </ul>
12	Letter from the relevant party requesting the SFDA approval.	
13	<a href="#">Application form of importation/re-exportation for radioactive materials.</a>	<ul style="list-style-type: none"> <li>See <a href="#">Annex (1)</a></li> <li>Fill in and print the form in a formal paper of the beneficiary organization.</li> </ul>

14	Commitment letter from the manufacturer to receive the radioactive materials after consumption.	<ul style="list-style-type: none"> <li>• For exportation only.</li> <li>• It shall include: <ul style="list-style-type: none"> <li>- Importer name.</li> <li>- Radioactive material name.</li> </ul> </li> </ul>
15	Copy of the radioactive material transportation agreement.	<ul style="list-style-type: none"> <li>• Fill in and print the form in a formal paper of the beneficiary organization.</li> </ul>
16	<a href="#">List of Radioactive Materials.</a>	<ul style="list-style-type: none"> <li>• See <a href="#">Annex (2)</a> <ul style="list-style-type: none"> <li>- It shall include the serial numbers of radioactive materials if re-export only.</li> <li>- Print the form in a formal paper of the beneficiary organization.</li> </ul> </li> </ul>

### Annex (3): Definitions & Abbreviations

KSA	Kingdom of Saudi Arabia
SFDA	Saudi Food and Drug Authority
MDS	Medical Device Sector
MDMA	Medical Devices Marketing Authorization
Beneficiary Organization	Healthcare providers or research centres
Healthcare Provider	The governmental or private agency provides health care services in the Kingdom and deals with radiation-emitting devices and products.
Medical Devices	means any instrument, apparatus, implement, machine, appliance, implant, in vitro reagent or calibrator, software, material, or other similar or related article: A) Intended by the manufacturer to be used, alone or in combination, for human beings for one or more of the specific purpose(s) of: - Diagnosis, prevention, monitoring, treatment or alleviation of disease, - Diagnosis, monitoring, treatment, alleviation of or compensation for an injury or handicap, - Investigation, replacement, modification, or support of the anatomy or a physiological process, - Supporting or sustaining life, - Control of conception, - Disinfection of medical devices, - Providing information for medical or diagnostic purposes using in vitro examination of specimens derived from the human body; and B) Which does not achieve its primary intended action in or on the human body by pharmacological, immunological, or metabolic means, but which may be assisted in its intended function by such means.
Radioactive Material	Material that emits ionizing radiation
Carrier	Person or facility that transfers radiation-certified device/product by any licensed mode of transportation.
Radiation Safety Officer	A scientifically qualified person with practical experience, holding a practice license in radiation protection and safety in the medical field.
RSO	Radiation Safety Officer
NRRC	Nuclear and Radiological Regulatory Commission
MDEL	Medical Device Establishment License
